- Conservatory Installer of the Year 2023
- 10-year warranty on all roofs
- Option to buy now and pay later
- 4.5/5 rating on review site reviews.io
- Members of GGF and Fensa
- Meet all British Standards for manufacturing
- All planning requirements taken care of
- Old roofs, windows and doors are taken away and recycled where possible
- Workmen neat and tidy, NVQ and MTC-trained
- Full aftercare provided by service department

## Choose quality

We are one of the north of England's largest and oldest home improvement firms – established in 1971.

Our family-owned and run business prides itself on quality manufacturing processes, expert fitting, and superb customer care.

Employing over 300 staff, we are trusted and recognised throughout the UK, and customers have peace of mind in dealing with a long-standing business whose ethos is providing exceptional quality and service.

# Benefits of replacing your conservatory roof

If you don't want to pay for a new conservatory but you have one which leaks, suffers from mould and condensation or that doesn't maintain a steady temperature all year round, installing a new insulated roof is the answer.

Replacing an outdated plastic or glass roof with a new insulated one will transform the appearance of your conservatory. It will also change the way it feels, alter its acoustics, and enable you to use it 365-days a year. If you do not know who fitted the conservatory originally, it doesn't matter because replacement roofs are suitable to be retro-fitted onto all conservatory brands.

Obviously, this does depend on the build quality of the original structure, but we will carry out a free initial roof check and handle all the necessary regulations to ensure your installation is fully compliant.

## Installation and planning permission

Upgrading to a new solid conservatory roof typically takes just one week, transforming your room into a comfortable and welcoming living space.

We take away and dispose your old roof and recycle where possible – leaving you with no mess and nothing to tidy up.

Most replacement conservatory roofs do not usually require planning permission and can be carried out under 'permitted development' rights.

If planning is required, we can remove the hassle by securing permission on your behalf – making sure your project is 100% compliant.

# Tiled roofs

Technologies have moved on so that there are now numerous options for keeping your conservatory warmer and more energy efficient.

Lightweight and easy to install, tiled conservatory roofs are the ideal solution when you want to create a cosy and comfortable space.

They not only help to eradicate draughts and provide added insulation, they even come with a choice of tile colour to help it blend in with your home's existing appearance.

## Premium composite tiles:

Brick red

Pewter grey

Stone black

Chestnut

## Lightweight steel tiles:

Charcoal

Antique red

Burnt umber

Ebony

Our tiled roofs are constructed from lightweight aluminium and are clad in either premium composite tiles or lightweight steel tiles, which both come in a range of colour options.

They can be retro-fit onto any existing conservatory as long as it is structurally sound – we will conduct a free roof check to ensure it is safe to proceed.

Consistent comfortable temperature all year round

Energy efficient

Reduced energy bills compared to glass and polycarbonate conservatory roofs

Can be fitted retro-fitted onto most existing conservatories

Tiled  
roofs

Make your home  
**warm, cosy and inviting**

## Energy Efficient

The fully insulated roof design achieves U-values as low as 0.15 - roughly 10 times more efficient than an A-rated window

## Enhanced living

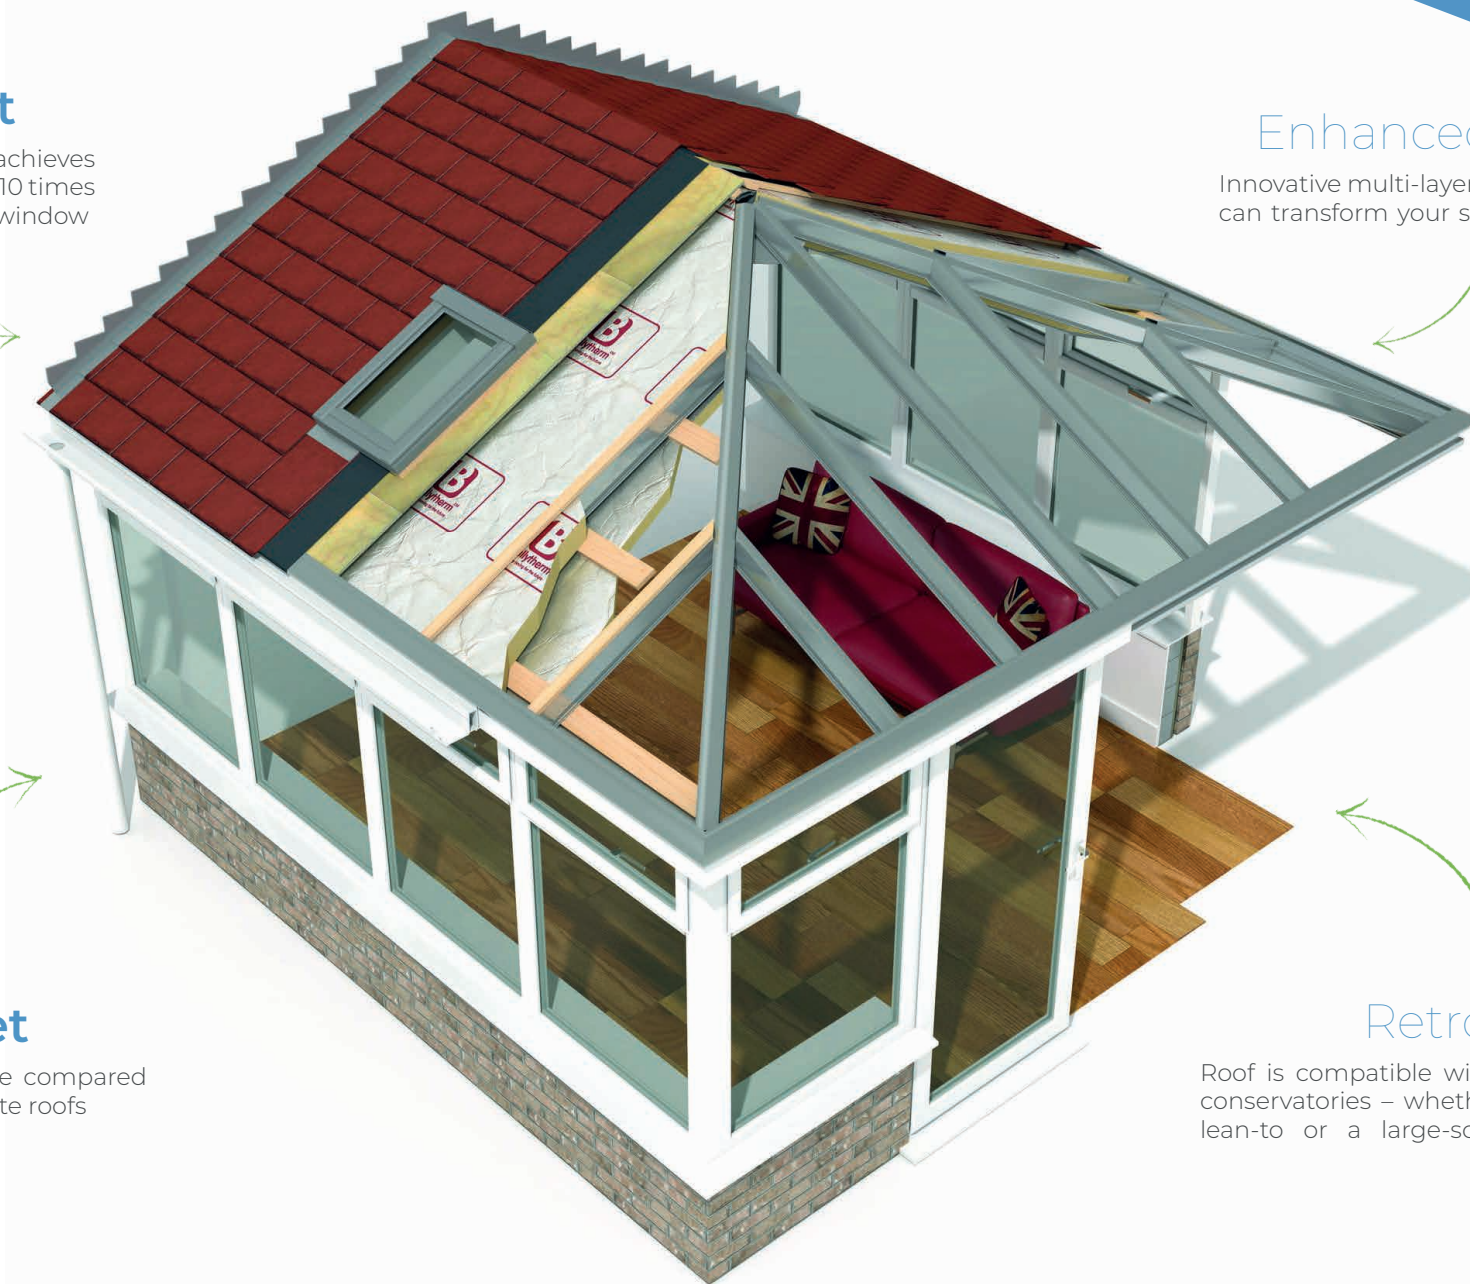

Innovative multi-layered roof design can transform your space and your lifestyle

## Peace & quiet

Reduced noise and glare compared to glass and polycarbonate roofs

## Retro-fitted

Roof is compatible with all types of conservatories - whether it's a small lean-to or a large-scale P-shaped design

Tiled  
roofs

Sunlight creates a **warm** and  
**ambient atmosphere** in your home

After

## Give your cold, old conservatory a complete overhaul

We replaced all the existing windows and roof on the tired dated conservatory, and fitted an insulated solid tiled roof to give it a complete modern overhaul.

The property owner said: "The old conservatory was 22 years old and had a polycarbonate roof. The solid roof really makes the conservatory more useable.

"We use it as a day room, and we are really happy with how it looks. The installation was brilliant. The guys who came were very hard-working, very friendly, and very polite. They were incredibly helpful and worked to an extremely high standard."

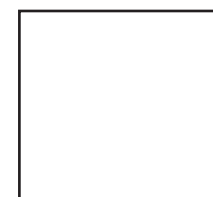

# Hybrid roofs

Our Hybrid roofs are our best-selling conservatory roof range – with home owners loving the practicality of an insulated roof with the aesthetic appeal of glass sections to let the light flood in.

Installing an aluminium and glass Hybrid Roof helps to achieve a more modern look and will bring any old conservatory back to life.

Finished and plastered inside like a normal ceiling, you can decorate and choose a colour scheme to suit your home's existing decor. There are a range of composite and steel tiles to choose from to personalise your design.

Golden Oak

Constructed from solid and glass panels, this lightweight vaulted roof creates a beautiful light-filled space which will maintain a comfortable temperature in all seasons.

Alternating solid and glass panels provide great insulation, while also adding extra light

Energy efficient

Can choose lay-out of glass roof sections

Range of colours available for tiles, to match your home

“We are delighted with the finished conservatory, the EYG team were also brilliant throughout.”

- Mr Kendrew, East Yorkshire

# Mr & Mrs Kendrew

Mr Kendrew called EYG as he felt more confident in dealing with a business that was established over 50 years ago.

We recommended a new conservatory which was cheaper than a brick-built extension, with an insulated Hybrid roof – which has alternating solid and glass panels along with insulated walls and flooring as well, which all combines to give the look and feel of an extension, with the same thermal efficiency.

Mr Kendrew said his family is loving the new open-plan kitchen area. “Ever since the completion of our new conservatory, my wife is always commenting on how she loves this new room and we have certainly been impressed by the sound proofing.”

Hybrid  
roofs

Enjoy your room all-year-round

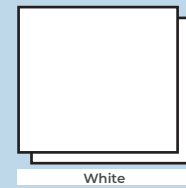

# Skypods

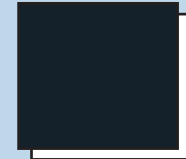

Skypods give height, a sense of grandeur, and a source of natural light, which transforms even the smallest and darkest of rooms. Ideal for single storey extensions and even garage conversions, the Skypod has clean, contemporary lines and gives a room a very modern feel.

The absence of any crestings or finials on the Skypod roof provides completely uninterrupted sight lines, flooding your home with natural light.

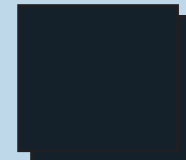

Available in a wide range of RAL colour choices, you can even opt for different internal and external colours on your UPVC frame.

Let the light in!

# Flat roofs

An EPDM (Ethylene Propylene Diene Monomer) black roof is widely considered to be the best roofing material for a replacement roof for garages and flat roof extensions. This rubber roofing material is durable, weatherproof, and resistant to extreme temperatures, which is why it's such a popular choice for flat roofs.

The good news is, it is also reasonably-priced, so you can re-vamp your old leaking roof with something that is affordable, long-lasting and maintenance-free.

Flat roofs do not have to be uninspiring – you can add a flat roof light or Skypod roof to create a beautiful light interior and a design statement. We can also install faux-grass roofs so that they blend in with your natural surroundings and become part of the garden landscape.

This couple love their faux grass roof, which we installed on the EYG garden room - over the rubber EDPM roof

“It makes a big difference, a big improvement. And from our perspective of looking out of our upstairs windows, we like it better. The neighbours have joked about going up there with a deck chair next summer.”

- Vince and Linda, Lincolnshire

# Roof lights

As one of nature's most impressive free resources, the role light plays in interior design should never be underestimated. Installing flat roof lights will allow you to take full advantage of the feel-good factor it creates.

A stunning addition to any property, the ultra-slim window boasts a weightless appearance and guarantees to breathe new life into previously dim or darkened rooms. With no supporting bars, you'll definitely see more of the sky and the stars.

All flat rooflights come fitted with active neutral self-cleaning glass as standard, which will help you keep it looking cleaner for longer.

Featuring 28mm insulated double glazing, this is highly energy efficient and will control the amount of visible light, UV rays and heat passing through the panes.

Available in standard white, grey, black, grey on white, and black on white.

The rooflight is built to withstand everything the British weather can throw at it. Its aluminium frame is powder coated for durability and has a UV-resistant, weather-tight seal.

It also comes in a choice of finishes to complement your home. Opt for a standard black or white frame or choose from a range of painted colour options.

Frame Colours:

White

Matt black

Glass options:

Clear

Blue

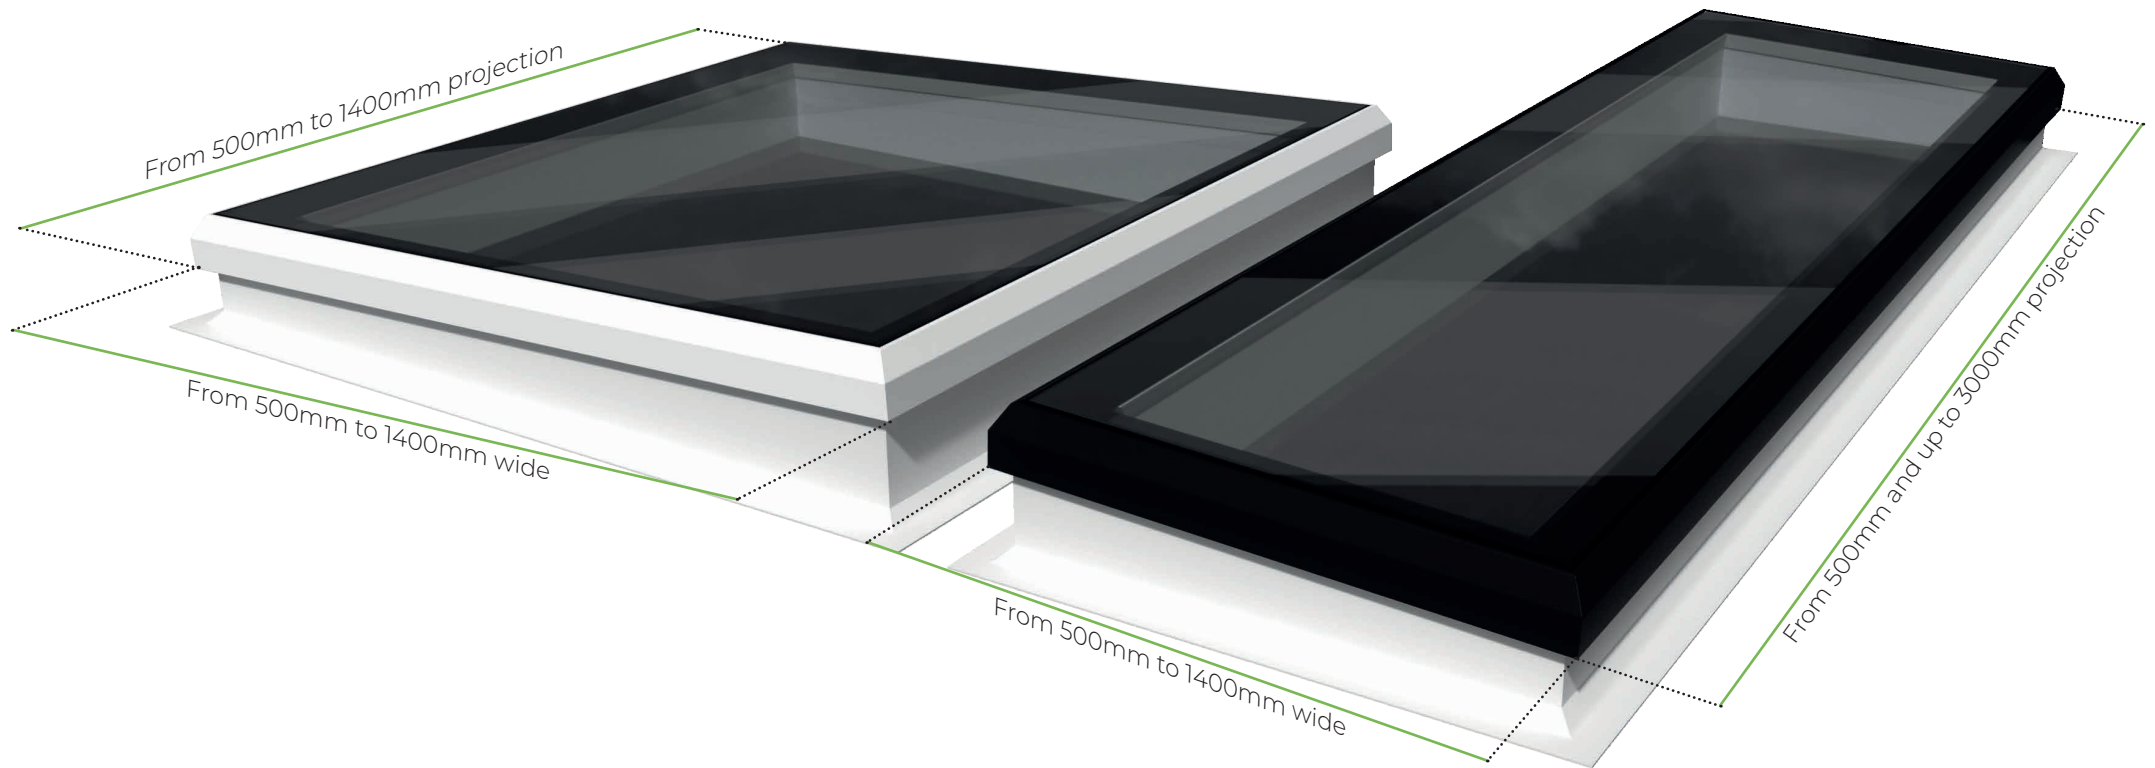

# Available in square and rectangular designs

Flat rooflights are made to measure, allowing you to create a rooflight that perfectly fits your space and style.

Square designs range from 500 x 500mm to 1400 x 1400mm, and rectangular designs from 500mm wide up to 3000mm projection. Add just one rooflight, or consider adding two or more for a large extension.

Flat rooflights are suitable for many projects, such as existing or new flat roof extensions, garage conversions, new builds and even garden rooms.

Stargaze at night

**Enjoy the stars with no bars**

# Glass & Polycarbonate roofs

Technologies have advanced so that modern-day glass and polycarbonate roofs are more thermally-efficient today

Tinted glass reduces the intensity of the sun's rays, whilst self-cleaning glass has a coating that reacts with UV light to break down dirt and minimise the need for maintenance. Polycarbonate is probably the most affordable conservatory roof option. Great for letting in natural light, these sheets require little to no maintenance and can last for up to 15 or 20 years.

They are also available in different colours and u-values. However, they obviously do not boast the same insulating properties as some of the more robust alternatives.

“The conservatory is wonderful and  
it has transformed the way we live  
in our home”

- Mr and Mrs Hawkes, East Yorkshire

# Porches

Porches can instantly add value to your property by providing it with an attractive design feature. As well as enhancing the look of your home, porches are also extremely practical - helping to shelter visitors from the elements.

All our porches can be made bespoke to your exact requirements, so you can choose the style which will best suit your property.

With six different porch roof designs to consider, we are confident you will find something that complements your existing taste - including flat roof, pitched roof, gable-end pitched, double hipped to wall, single hipped and double hipped to ridge.

If you want to add a porch to any external door of a house, it does not need planning permission if it is under 3sm in floor area and not within 2 metres of any boundary that is adjacent to a highway.

- Can improve a home's kerb appeal by adding an extra design feature
- Choice of designs
- Provide shelter for visitors
- Offers extra weatherproofing and insulation to your home's exterior
- Porches provide extra space for storing coats, boots and shoes
- Additional security measure for your home
- No planning permission necessary

# Door canopies

Made from Glass Reinforced Plastic (GRP), our door canopies are available in a wide range of roof shapes and often prove to be more cost-effective than building a porch.

Both lightweight and durable, a door canopy will give your home a distinctive look and make it stand out from the rest. We also have a range of door surrounds, porticos, and bow bay canopies, which give your home a grand appearance and will provide extra kerb appeal.

So regardless of the size or style of your home, we can provide a GRP door canopy to suit.

Want to earn up to

# £400?

Would you like to earn up to £400? If you are an existing customer you can receive a payment from us for recommending EYG to a friend, if they go on to make an order.

So if a member of your family or friend is interested in making an improvement to their home and you recommend us, we will give you a 'thank you' in return. You will receive payment at the end of the month, once the balance of their order has been paid. So recommend us to a friend today, and earn yourself a cash reward.

## BUY NOW - PAY LATER

If you do not wish to pay for your home improvements in full, there are options to buy it through our finance options. You can order now and not pay for nine months, and keep your hard-earned cash in the bank. For full details on our finance options, visit <https://www.eygwindows.co.uk/funding>
